I've compiled all the text files and the two graphic files into .zip files for your convenience. Please read the following first. It's short and makes sense. I'm not trying to gouge anyone for fees and I have put a lot of work into this free tutorial:

Terms for Free Use

This entire tutorial is © 1999 Peter Denvind Wright (see top of file for contact information). It is intended as a free tutorial for learning tarot either online or through downloading to a personal computer. Copying and distribution is allowed as long as this tutorial is not sold or used as part of any publication, production, class, or talk for which fees are charged or unless the author's written permission and terms of use have been obtained and agreed upon before hand. In English, feel free to use this, to download it, to print it out, send copies to friends (electronically or on paper) and to share this with anyone wishing to learn tarot, but under no conditions is it to be used to make any money without terms being arranged with me in advance.

Sorry for the nasty legal talk, but it's necessary to make sure people don't take my work and make it into their profit. This tutorial is intended to spread knowledge, but not to help others increase their wealth at my expense. There is no monetary cost for this tutorial, either online, or the download version. I do ask, though, that you send me e-mail (denvind@poetic.com) or a post card (Peter Denvind Wright, P.O. Box 3571, Richmond, VA 23235) to let me know this has helped you learn tarot. I am, among other things, a writer, and I would like to know when my work helps people.

Personally, I think I'm being generous and I can't see why anyone would have trouble agreeing to these terms. Downloading or printing or saving any of these files is your way of saying you consent to these terms.

I put much thought into what formats to use for downloaded archive files. I decided on .zip files since Winzip on Windows is easy to use and there are free or shareware equivalents on almost all computer platforms. For many of the same reasons, I decided

to make my archives available in .pdf formats. This format works with a free program that runs on most types of computers. It's the Adobe Acrobat Reader, which you can get (again, for free) from Adobe at www.adobe.com. Look in their Products section.

I've also put up an archive with .wpd files (version 7/8/9), since this was written with Word Perfect. This contains my original files. There is also an archive with text files. I have made no attempt or pretense at formatting the .txt files. I just saved my Word Perfect files as text files. Due to the Javascript navigation menus, it is impractical to create an archive for HTML files (maybe in the future?).

I recommend getting either the Acrobat Reader or Word Perfect files. Remember the Acrobat Reader is free and it allows you to print the files as well.

If you download these and find them of use, just send me a quick e-mail. I want to know if this is helping anyone. Thanks and blessed be!
